

Randima Nayanajith

SOFTWARE ENGINEER / PRODUCT BUILDER / SECURITY RESEARCHER

Sri Lanka · Selected work résumé

github.com/ApestoX ↗

01 / INDEPENDENT PRODUCTS

Product work

Maplivo — Local-first mind mapping for organising connected ideas. Product concept, interface design and web engineering. In development.

NoteCheck — Notes, reminders and a private vault in one focused workspace. Product concept and interface design. In development.

02 / CYBER SECURITY

Research

AiSight — MSc research into a multi-agent phishing defender. Combines URL, language, page content and screenshot signals to support clearer browser warnings. Research and prototype.

Exploit-Edge — Research into agent-based security testing and tool coordination.

03 / SOFTWARE RELEASES

Published tools

PortSlayer — Published cross-platform command-line tool for managing occupied development ports. Available on PyPI.

ScriptPilot — VS Code extension. ReQuill — Windows workspace for working with AI models.

04 / FOUNDATION

Education & capabilities

MSc in Cyber Security and Forensics. Software engineering with React, TypeScript, Next.js, Python and FastAPI. Research interests include AI agents, browser safety and phishing detection.
